Supplementary Fig. 4. Expression levels of myogenic markers increased during differentiation. Relative mRNA levels of (A) myosin heavy chain (MyHC), (B) myogenin (MyoG), and (C) insulin growth factor 2 (IGF2) during culture in growth medium (GM) (–2, –1, and 0 day) and differentiation medium (DM) (2, 4, 6, and 8 days). *P<0.001.
