

Supplementary Table 3. Changes in CGM parameters from baseline to 9 months follow-up according to paired *t*-test

Parameters	Baseline	Follow-up (9 months)	<i>P</i> value
Time in range, %	44.0 (34.0–53.0)	57.0 (39.5–64.5)	0.032
Mean glucose, mg/dL	171.5 (124.5–205.5)	169.5 (131.0–194.0)	0.701
Coefficient of variation, %	41.5 (35.8–47.2)	41.8 (36.2–46.4)	0.326
Active usage time percentage of CGM	74.0 (61.0–95.0)	89.0 (78.0–99.0)	0.036

Values are presented as median (interquartile range).

CGM, continuous glucose monitoring.
