Glucose regulation after partial pancreatectomy

Partial pancreatectomy performed from Sep 2015 to Dec 2018 ($n=398$ patients)

Excluded ($n=174$)
- Central pancreatectomy or enucleation ($n=5$)
- Incomplete tests (OGTT, etc) ($n=127$)
- Follow-up loss within a year ($n=18$)
- Death within a year ($n=24$)

Included in analysis ($n=224$)

Pancreaticoduodenectomy ($n=152$)  Distal pancreatectomy ($n=72$)

Matched with age, sex, BMI, glucose, and the nature of pancreas disease

Pancreaticoduodenectomy ($n=72$)  Distal pancreatectomy ($n=72$)

Supplementary Fig. 1. Patient selection flow. OGTT, oral glucose tolerance test; BMI, body mass index.
