

Supplementary Fig. 14. (A) Network map, (B) interval plot, and (C) comparison-adjusted funnel plot for network meta-analysis of antidiabetic drugs on total stroke among subjects with low cardiovascular disease risk ($n=40$ trials). The global test for inconsistency gives a P value of 0.969, giving no evidence of inconsistency. A, placebo; B, metformin; C, sulfonylurea; D, thiazolidinedione; E, dipeptidyl peptidase-4 inhibitor; F, sodium glucose cotransporter-2 inhibitor; G, glucagon-like peptide-1 agonist; CI, confidence interval.
