

Supplementary Fig. 4. Effects of evogliptin (Evo) on renal and plasma dipeptidyl peptidase-4 (DPP-4) activity on days 7 post-unilateral ureteral obstruction (UUO). (A) DPP-4 activity in the kidney. (B) DPP-4 activity in the plasma. Data are the mean \pm standard error of the mean of five random fields from each kidney. CON, control; NS, not significant. ^a $P < 0.05$, ^b $P < 0.001$.
