**Supplementary Table 4.** Comparison of glycemic outcomes between the cases with CII protocol and their matched controls

<table>
<thead>
<tr>
<th>Variable</th>
<th>Cases with the CII protocol</th>
<th>Controls</th>
<th>P value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Patients with hypoglycemia alert values (≤70 mg/dL)</td>
<td>1 (1.6)</td>
<td>12 (20)</td>
<td>0.003</td>
</tr>
<tr>
<td>Time required to achieve a glucose range of 70–180 mg/dL, hr</td>
<td>6.0 (2.0–10.0)</td>
<td>10.0 (6.0–15.0)</td>
<td>0.002</td>
</tr>
<tr>
<td>% Time in a glucose range of 70–180 mg/dL</td>
<td>62.72 ± 27.19</td>
<td>52.57 ± 25.67</td>
<td>0.017</td>
</tr>
<tr>
<td>% Time in a glucose range of 70–180 mg/dL after achievement of glucose range (70–180 mg/dL)</td>
<td>81.25 ± 21.70</td>
<td>68.09 ± 25.78</td>
<td>0.002</td>
</tr>
</tbody>
</table>

Values are presented as number (%), median (range), or mean ± standard deviation.

CII, computerized intravenous insulin infusion.
